EYEWEAR RETAINER FIT GUIDE

Use this handy guide to find the best fit for your frames.

Using a ruler, measure at the widest point of the temple tip (the portion of the frame that rests at your ears). For frames over 8mm with rubber/silicone at the temple tip, add 1mm to your final measurement for improved ease of installation. If between sizes, we recommend sizing down to ensure a secure fit.

unit: 1cm = 10mm
